The Summary Report—Synopsis of Key Results

The subjects covered in this Report include area, population, households, age, sex, marital status, birthplace, religion, dwelling type, tenure, household size, occupational density, amenities, cars and economically active persons.

The tables contain information for each of the 26 local government districts. Tables 1–4 (as in tables 1–5 of the Preliminary Report and tables 1–4 of the Belfast Report) contain two categories of figures. The first relates to the enumerated households and these should be treated as accurate in regard to the information they contain. The second relates to the estimated population effect of non-enumerated households which is based on information derived from the Census results for the particular area (i.e. Northern Ireland, district or ward). Since these are estimated figures, they must not be regarded as having the same degree of accuracy as the enumerated figures. As with all estimates, they are subject to revision in the light of information from other sources.

All other tables refer to the enumerated households only.

Population Present on Census Night

As enumerated at midnight on 5 April 1981 the Northern Ireland population was 1,488,077. This is a decrease of 2,151 on the provisional figure of 1,490,228 stated in the Preliminary Report issued in July 1982. This does not take into account the population effect of the non-returns which is estimated at around 19,000. In the 1971 Census the total enumerated population present on census night was 1,536,065.

Usually Resident Population

The number of people usually resident in Northern Ireland (i.e. excluding visitors but including residents who were absent on census night) was enumerated at 1,481,959. Again this does not take into account the population effect of the non-returns, which is estimated at around 19,000.

Young and Old

Compared with the 1971 Census the 1981 figures reveal a higher proportion of elderly persons in the population, with 14.5 per cent of persons of pensionable age (men aged 65 or over and women aged 60 or over), and 4.4 per cent aged 75 years or more. In 1971, 13.3 per cent of the population were of pensionable age and 3.8 per cent were 75 years or more. In 1981, 27.9 per cent of the population were under 16 years whereas the corresponding figure in 1971 was 31.5 per cent.

Men and Women at Work

The figures show that 62.8 per cent of men aged 16 and over were in employment (full-time or part-time) at some time in the week before census day (30 March to 5 April 1981). A further 14.9 per cent were out of employment in the week before census day, i.e. seeking work, prevented by temporary sickness from seeking work or waiting to take up a job already accepted. The remaining 22.3 per cent were economically inactive and, of these, 26.6 per cent were full-time students representing 6.0 per cent of the overall total.

Of women aged 16 and over 36.4 per cent were in employment (full-time or part-time) at some time in the week before census day.

An alternative method of measuring the unemployment rate is to express the numbers out of work as a percentage of the numbers who are economically active, rather than as a percentage of the total numbers. On this basis, the proportion of persons who were out of employment in the week before census day was 19.1 per cent for men and 12.6 per cent for women.

Households

There were 456,348 enumerated private households, which on the basis of usually resident population contained an average of 3.2 persons per household. In 1971 there were 427,434 households which on the basis of population present contained an average of 3.5 persons per household.

Living Alone

The number of households in which one person usually lives alone was 85,238 or 18.7 per cent of private households with a usual address in Northern Ireland. In 1971 the comparable figures, based on the population present, were 63,903 or 15.0 per cent.

Overcrowding

In 10.4 per cent of households there was more than one person per room compared with 15.9 per cent in 1971.

Owner Occupiers and Tenants

49.4 per cent of households were in owner-occupied accommodation and 39.3 per cent in accommodation rented from a local or public authority. The comparable 1971 figures are 45.9 per cent and 34.6 per cent respectively.

Household Amenities

9.6 per cent of households lacked or were forced to share with another household the use of a fixed bath or shower, compared with 28.2 per cent in 1971.

Availability of Cars

40.1 per cent of households had no car available for use by members of the household, compared with 46.4 per cent in 1971.

Religion

There was a high level of non-response to the voluntary question on religion. The figures show that 18.5 per cent of the population in Northern Ireland failed to answer it. This compares with 9.4 per cent in 1971.

1981 CENSUS

Programme of Census Reports

1. Preliminary Report

This report was published in July 1982 and contained provisional figures of the population and private households for each of the 26 local government districts with a brief statistical commentary.

2. Report for Belfast Local Government District

This report was published in December 1982 and related to the Local Government District of Belfast. The tables contained information to Ward level. Subjects covered in this report included age distribution, sex, marital status, birthplace, religion, households, tenure, amenities, occupation density, availability of cars, communal establishments, economically active population and employment status.

3. Summary

The Summary Report contains information for Northern Ireland and for each of the 26 local government districts. The subjects covered include age distribution, sex, marital status, birthplace, religion, households, tenure, amenities, occupation density, availability of cars, communal establishments, economically active population and employment status.

4. Economic Activity

This report will contain tables giving the figures for the both economically active and inactive population. The employed population will be analysed by industry and occupation classifications and related to age, marital status, employment status, socio-economic groupings, area of work-place, etc. Most tables will contain information at Northern Ireland level but certain ones will give details for local government districts.

5. Housing and Household Composition

This report will give detailed information on households, tenure, occupation density, car availability, sex, age, marital status and will relate household composition to social and other economic characteristics.

6. Workplace and Transport to Work

Employed population details in relation to area of workplace/residence will be contained in this report. Workplace movement by socio-economic group, occupation, industry, means of transport and times of journey will also be detailed to local government district level.

7. Migration

Numbers and characteristics of the population who changed their usual address in the year before Census day will be contained in this report. Migrant households will be detailed by age, sex, marital status, etc. Some tables will refer to Northern Ireland and others will be detailed to local government districts.

8. Education

This report will give details of age, sex, occupation and industry of the population who have obtained higher educational qualifications analysed to Northern Ireland level.

9. Religion

Tables in this report will give, by the main religious denominations, details of the population by sex, age, marital status, occupation, industry and other characteristics.

Explanatory Notes and Definitions of Terms used in the Report

Area and Administrative Divisions

The figures on areas have been supplied by the Ordnance Survey and rounded to the nearest hectare. They include the areas of the larger rivers and lakes except for those specified at appropriate footnotes to tables. A hectare is equivalent to 2.471 acres. The local government districts and wards for which statistics are presented in this report are those in existence at the date of census.

Population

Census results are presented as cross tabulations, each counting a particular population, for example, people, households, families or people in communal establishments. It is important to know exactly what is being counted, i.e. the population base. Information on whereabouts and usual address given for each person listed on the Census form can be used to derive the population base.

The **population present on census night (present population)** in an area is the count of all people recorded as spending census night in the area regardless of whether or not this was where they usually lived; that is, all persons recorded on the Census H Forms for whom the whereabouts on census night was given as the relevant household, plus all persons recorded as being in communal establishments.

The **usually resident population** in an area is the count of those people recorded on the forms for the area as usually living 'at this address' whether or not they are present on census night.

Shipping: Apart from houseboats (enumerated as private households), vessels were treated in a similar way to communal establishments with a listing form and individual return forms for each person on the ship. Persons on naval vessels in Northern Ireland waters or ports on census night were included as present in the home base port of the ship. Generally persons on other vessels were counted as present in the area in which the form was collected. For shipping moving between a port in Northern Ireland and a port in England, Wales, Scotland, Isle of Man or Channel Isles arrangements were made for the return of forms to the issuing country and persons in such vessels were counted as present in the area of issue.

Campers, Vagrants, Persons sleeping rough, etc.

The present population also includes persons not enumerated in private households or communal establishments, for example, vagrants, persons sleeping rough and persons enumerated in caravans or other non-permanent structures which were not the usual residence of any persons present on census night.

Population covered in this Report

Figures contained in this report refer to the usually resident population basis with the exception of Tables 1 and 2 which compare the population present in Northern Ireland on Census night 1981 with the corresponding figures for 1971. In Table 16 (Communal Establishments) the figures relate to the persons present in such establishments on census night.

Households

A household is either one person living alone or a group of persons (who may or may not be related) living at the same address with common housekeeping. Persons staying temporarily with the household are included. A group of people are treated as a household if there is any regular arrangement to share at least one meal a day. Two people who share one room, although each may have separate catering arrangements, are treated as one household. A household must have exclusive use of at least one room.

Dwellings

Dwellings are classified to include private dwelling houses, bungalows or flats with independent access to the street or to a common staircase or hall. A count of the occupied dwellings was not included in the 1981 Census as previous attempts were not entirely successful. This was due to difficulties in identifying buildings, other than purpose built blocks of flats, occupied by more than one household and partly due to the low incidence of multiple household dwellings revealed in the 1971 Census.

An occupier absent dwelling is one in which at least one household usually, or occasionally, lives but was absent on census night.

A vacant dwelling is one which was fit or ready for habitation but was awaiting occupancy – this type of dwelling would invariably be unfurnished. Derelict or uninhabitable dwellings are excluded.

Non-permanent dwellings

Caravans or mobile structures and such non-permanent structures as huts, shacks, tents, etc., are treated as dwellings only if they were some person's usual residence on census night. If such structures were vacant on census night they were excluded.

Shared dwellings

A shared dwelling is a dwelling occupied by more than one private household.

Communal Establishments

People were enumerated in a variety of communal establishments (non-private establishments) such as hotels, boarding schools, hospitals, prisons, religious communities, etc. The population enumerated in communal establishments plus vagrants and campers is referred to as the population in non-private households. It includes all those present in the establishment on census night and all who arrived on Monday 6 April 1981 and who had not been included as present on a census form elsewhere. Non-resident staff/personnel on duty in the premises on census night are not included.

Separate buildings in the grounds of an establishment for the accommodation of private households such as a doctor's house or caretaker's cottage in the grounds of a hospital, are classed as private residences and not as part of the communal establishment. People occupying flats or suites of rooms within the main building of an establishment are treated as part of the main establishment and included on the 'L' form. Service families or civilians living in married quarters of the Armed Services are treated as private households whether the quarters were located within or outside the boundaries of the service establishment.

Annexes to communal establishment are treated as part of the main establishment if located in the same enumeration district or if meals were taken at the main establishment even though the annexe was in a different enumeration district.

Establishment Classification

The categories are as follows:

1. Hotels, etc.
2. National Health Service (NHS) hospitals and homes.
 - (i) Psychiatric.
 - (ii) Other.
3. Non-NHS hospitals and homes.
 - (i) Psychiatric.
 - (ii) Other.
4. Homes for the old and disabled.
5. Children's homes.
6. Educational establishments.
7. Places of detention.
8. Defence establishments including naval vessels and service hospitals.
9. Civilian ships, boats and barges.
10. Hostels and common lodging houses.
11. Other miscellaneous establishments.
12. Campers and vagrants.

Residence Classification

Persons enumerated in groups 1 to 7 and 10 and 11 above are given one of the 3 following residence classification codes:

- (i) Managers and staff.
- (ii) Inmates.
- (iii) Relatives of managers and staff and others.

All persons present in groups 8, 9 and 12 are classed under category (ii).

Age

Age is the completed years of age at census date as derived from the date of birth question.

Pensionable Age

Pensionable age is the minimum age at which a person may receive a National Insurance Retirement Pension—60 for women and 65 for men.

Usual Address

In most cases the answer to the usual address question is straightforward. However, students and children away from home during term-time were to regard their home address as their usual address. Boarders were to decide whether they considered as their usual address, the address of the relevant household. Household heads living away from home for part of the week were to regard their home address as their usual address.

Persons who failed to answer the relevant questions appear as part of the usually resident population in the area in which they were enumerated and are included as part of a usually resident private household.

Visitors

Visitors are those present at the relevant household address on census night whose usual address is elsewhere.

Country of Birth

Persons born in Northern Ireland, Wales, Scotland, England or the Republic of Ireland were asked to tick the appropriate box. Persons born in another country were asked to tick the 'Elsewhere' box and write the present name of the country.

Religion

It was not obligatory to answer the question on religion. The question was worded as follows:

Please state the Religion, Religious Denomination or body to which the person belongs. The term 'Protestant' should not be used alone and the denomination should be given as precisely as possible.

Religion

The classification of religions includes a separate heading for each religion. Religions which differ only or mainly in denominational terminology are generally grouped together and the figures for the group as a whole are shown under the name by which the group is officially or commonly known. Thus the heading Presbyterian includes United Presbyterian, Trinitarian and Church of Scotland. Church of Ireland is regarded as embracing both Anglican and Episcopalian except for persons so described whose usual address was in England: in such cases the Church of England classification was applied.

Economic Activity

The economic activity tables describe the economic characteristics of the population. The characteristics include both those obtained directly from census questions – economic position, employment status, occupation, industry and workplace – and others derived from combining answers to these questions – social class and socio-economic group (from employment status and occupation) and socio-economic class (from social class and socio-economic group).

Only specified groups were required to answer such of the economic activity questions and this is reflected in the population to which tables refer. Thus:

- (a) Tables relating to economic position include only persons aged 16 years and over.
- (b) Tables relating to social class or socio-economic group or socio-economic class cover the economically active, retired from employment and permanently sick.
- (c) Tables relating to occupation cover the economically active.
- (d) Tables relating to employment status, industry and workplace cover persons in employment.

Economic Position

The Classification by Economic Position is as follows:

Economically Inactive

Retired means wholly retired from employment and no longer seeking paid work. Married women engaged on unpaid home duties are not regarded as retired but classed as other persons economically inactive.

Students are persons in full time attendance at an educational establishment irrespective of whether or not they have part-time or seasonal employment.

Other persons economically inactive includes those persons never in employment and not seeking work. Included are persons of independent means, housewives and others engaged in unpaid domestic duties and the permanently sick or disabled.

Economically Active

In employment means having a job during the week ended 4 April 1981. Temporary, part-time or casual employment is included. Persons absent from their employment due to holidays, strikes, lock-outs, short time working or temporary stoppages are regarded as in employment. Persons off work sick are regarded as in employment if their jobs are waiting for them on return.

Out of employment means seeking work or prevented by temporary sickness from seeking work or waiting to take up a job already accepted.

Employment Status

The classification of employment status is as follows:

Self-Employed

1. Without employees.
2. With employees.

Employees

1. Managers.
 - (a) large establishments.
 - (b) small establishments.
2. Foremen and supervisors.
 - (a) manual.
 - (b) non-manual.
3. Professional employees.
4. Apprentices, articled pupils, formal trainees.
5. Employees (not elsewhere classified).

Information on occupation is used to distinguish the various types of employees and information on name and business of employer to distinguish the size of the establishment. **Large establishments** are those classified by the Department of Economic Development as having 25 or more employees and **small establishments** as those with fewer than 25. Details of employment status codes are contained in pages vii-ix of the Classification of Occupations 1980 published by HMSO under ISBN 0 11 6907282.

Rooms

Private households were asked to count the number of rooms in their accommodation, but not to count the following:

Kitchens less than 2 metres (6 feet 6 inches) wide, bathrooms, toilets, sculleries, closets, store-rooms, landings, halls, recesses or rooms used for business, professional or trading purposes.

NOTE: Rooms divided by curtains or portable screens count as one; those divided by a fixed or sliding partition count as 2.

In unshared dwellings the head of the household provided information. In shared dwellings, the enumerator was instructed to enquire of each household in the dwelling if any room was shared by another household. If any room was shared by 2 or more households the enumerator was further instructed to check the answer to the question and if necessary, alter it to show the extent of the sharing.

In the tables classifying households by rooms occupied, any room shared by 2 or more households is allocated to one household to avoid the use of fractions and to ensure that the total number of rooms in the dwelling is not altered.

Tenure

Heads of households were required to indicate under the following headings how they occupied their accommodation:

As an owner occupier (including purchase by mortgage):

1. Of freehold property (for which no ground rent is paid).
2. Of leasehold property (for which ground rent is paid).

By renting, rent free or by lease:

3. From a public authority (e.g. N.I. Housing Executive).
4. From a housing association or charitable trust.
5. Unfurnished from a private landlord, company or other organisation.
6. Furnished from a private landlord, company or other organisation.
7. In some other way.

If more than one form of tenure was indicated Census Office decided the most appropriate answer and in the absence of any further information assigned it to the 'in some other way' (which included the not stated) category.

A shared dwelling was classified according to the tenure stated by the main household.

Density of Occupation

The density of a private household is the ratio of the number of persons in a private household with usual residents to the number of rooms occupied by the private household. The following ratios of density are used:

- Over 1.5 persons per room.
- Over one and up to 1.5 persons per room.
- Over 0.75 and up to one person per room.
- 0.5 and over and up to 0.75 persons per room.
- Less than 0.5 persons per room.

Household Amenities

The amenities on which information was collected in respect of each private household are listed below. In the case of fixed bath or shower and flush toilets the householder was required to indicate whether individual amenities were used only by the household, shared with another or were not available.

- (a) A fixed bath or shower permanently connected to a water supply and a waste pipe.
- (b) A flush toilet (WC) with entrance **inside** the building.
- (c) A flush toilet (WC) with entrance **outside** the building.

In the 1981 Census additional information on amenities was collected in respect of each private household. Householders were required to indicate whether the household had use of the following amenities:

Water supply

1. Public supply piped into house.
2. Public supply at a standpipe.
3. Other.

Domestic sewage disposal

1. Public sewer.
2. Septic tank/cesspit.
3. Dry closet/chemical toilet.

Central heating

Central heating is a heating system designed to heat 2 or more rooms. This includes electric storage radiators but not moveable electrical appliances such as electric fires or convector-type heaters.

Fuel or Power

The types of fuel or power used to provide the main source of heating for the household include:

1. Solid fuel (includes coal, anthracite, wood, turf).
2. Electricity.
3. Oil (includes paraffin).
4. Mains Gas.
5. Bottled Gas.
6. Other means.

Insulation

The types of insulation include:

1. Roof space insulation.
2. Cavity wall insulation.
3. None.

Cars and Vans

The number of cars and vans normally available for use by the household including any car or van provided by employers but excluding vans used solely for the carriage of goods.

Presentation Conventions

A dash (-) indicates that the entry is zero. A blank indicates that a particular combination of line and column is impossible. In the presentation of rates, a rate shown as 0 indicates that the actual rate is less than one half of a unit but is not zero.

'H' Form

For reference purposes the 'H' form used for private households in the 1981 Census is produced at the end of this report.

Explanatory Note on Tables

Inclusion of Estimated Figures

Tables 1-4 of this report (as explained in the Preliminary Report in relation to Tables 1-5 and in the Belfast Report in relation to Tables 1-4), give estimates of non-enumerated households and their estimated effect on the population figures. Again it should be noted that the estimate for a particular unit (e.g. Northern Ireland total) may not equal the sum of the estimates of component sub-units (e.g. local government district). For Northern Ireland the estimate is based on the overall enumeration for Northern Ireland and for the district the enumeration for the district. As both average household sizes and the proportion of non-enumerated households vary from district to district, the total achieved by aggregating districts will not necessarily be the same as the total at Northern Ireland level. In calculating the average household size the population of communal establishments and institutions has been excluded.

Towns

The towns listed in Table 4A of this report are urban areas with no legally defined boundaries and with a recorded population of 1,000 or more. In previous censuses towns were defined in terms of local government administrative areas but with local government reorganisation on 1 October 1973 towns with legally defined boundaries disappeared. For 1981 Census purposes therefore, information for towns has been obtained by relating urban areas to specific Irish Grid squares.

1981 CENSUS—NORTHERN IRELAND

H Form for Private Households

A household comprises either one person living alone or a group of persons (who may or may not be related) living at the same address with common housekeeping. Persons staying temporarily with the household are included.

To the Head or Joint Heads or members of the Household.

Please complete this form and have it ready for collection by the Census enumerator who will call on **Monday 6 April 1981** or soon after that day. If you are not sure how to answer any of the questions, the enumerator will be glad to help you when he or she calls. He will also need to make sure that you have filled in all these entries and you should give him any information which he may need for this purpose.

Completion of this form is compulsory under the Census Act (Northern Ireland) 1969, and if you refuse to complete it or give false information you may have to pay a fine of up to £10. There is no penalty for refusing to state religious denomination as this is a voluntary question.

The legal obligation to fill in the form rests on **you** but each person who has to be included is required to give you the information which you need. However, if any member of the household who is aged 16 years or over does not wish to give you his personal information, please ask the enumerator for an individual form and envelope. The completed individual form can then be returned in the official envelope direct to the enumerator or to the local census officer and you need only answer questions 1, 5 and 6 on this form for that person. If the completed individual form is given to you in the envelope, you should pass it unopened to the enumerator.

The information which you give on the form will be treated as **STRICTLY CONFIDENTIAL** and will be used only for compiling statistics. No names and addresses will be fed into the computer and **no information about named individuals will be passed by the Census Office to any other Government Department or to any other Authority or person**. If anyone in the census organisation improperly discloses information which you provide, he will be liable to prosecution. Similarly, you must not disclose any information which anyone (for example, a visitor or boarder) gives you to enable you to complete the form.

When you have completed the form, please sign the declaration at the foot of the last page.

11. Whether working, retired, housewife, etc. last week

Please tick all boxes appropriate to the person's activity last week.

A job (box 1 and box 2) means any work for pay or profit but not unpaid work. It includes:

- casual or temporary work
- work on a person's own account
- work in a family business
- part-time work even if only for a few hours

A part-time job (box 2) is a job in which the hours worked, excluding any overtime are usually 30 hours or less per week.

Tick box 1 or box 2, as appropriate, if the person had a job but was not at work for all or part of the week because he or she was:

- on holiday
- temporarily laid off
- on strike
- sick

For a full-time student tick box 9 as well as any other appropriate boxes.

Do not count as a full-time student, a person in a paid occupation in which training is also given, such as a student nurse, an apprentice or a management trainee.
